SUMMARY

Full-stack web developer with an educational background in psychology. Equipped with strong problem-solving abilities and a deep understanding of user experience, I bring a unique perspective to create user-centric web applications. With a foundation in psychology, I leverage my understanding of human cognition and behavior to create engaging user experiences.

TECHNICAL SKILLS

Web technologies: Javascript, React, Node, HTML, CSS, jQuery, OOP, handlebars, sequelize, Bulma, Bootstrap
Databases: MySQL, MongoDB, noSQL

PROJECTS

Go For Fitness: A workout and nutrition webpage that randomizes meal and workout plans based on the users preferences.
- My role: Developed the HTML & CSS as well as assisted in some Javascript.
- Deployed Site: https://jacobryanwillis.github.io/Your_Digital_Personal_Trainer/
- GitHub Repo: https://github.com/JacobRyanWillis/Your_Digital_Personal_Trainer

Employee Tracker: A backend application that allows the user to add or edit employee or manager roles in the database by using the terminal.
- Developed the backend using node.js, MySQL, and inquirer.
- GitHub Repo: https://github.com/alyssageria/employee-tracker-SQL
- Demonstration Video: https://drive.google.com/file/d/1rXQ8MkYuUNjhsdJs0Ky8S0w5FkPDwB2j/view?usp=sharing

Weather Dashboard: A weather dashboard utilizing openweather API to deliver the current weather as well as the following 5 day forecast.
- Developed this front-end application using HTML, CSS as well as JavaScript.
- Deployed Site: https://alyssageria.github.io/weather-dashboard/
- GitHub Repo: https://github.com/alyssageria/weather-dashboard
